

Classroom Energy Saving Pledge

*Conserving Resources...One Classroom At A Time! **

- 1. We will turn off our lights when we leave the classroom or when the light coming in through our windows is bright enough.**
- 2. We will keep our windows and doors closed when the air conditioner or heat is on. If the room is too cold or warm, we will tell the principal.**
- 3. We will turn computers, monitors, overheads, TVs, VCRs, and other electrical equipment off when they are not being used.**
- 4. We will keep our thermostat set at 68°F to 72°F during the winter and at 72°F to 76°F when we are using air conditioning.**
- 5. We will keep desks, books, and other materials away from air conditioning vents.**
- 6. We will recycle all of our classroom paper and reuse any that only has printing on one side.**
- 7. We will post signs in our classroom to encourage energy savings and recycling.**
- 8. We will support school-wide energy saving efforts by reporting leaks or maintenance problems to the principal.**
- 9. We will teach others about being environmental stewards.**

We, as a classroom team, commit to the energy saving behaviors listed above on this day _____
